<https://github.com/sametkzdl>

Motivated Web/Frontend Developer with experience in building high-performance applications using React, Next.js, and Node.js. Skilled in developing SEO-friendly websites, managing forms, and integrating APIs. Eager to grow in software development, focusing on enhancing technical expertise and contributing to innovative solutions.

## EDUCATION

### Istinye University

09/22 - Present

*Bachelor of Management Information System (English)*

- Currently in the third year of the bachelor's program.

## EXPERIENCE

### SistemPlus

11/23 - Present

*Web/Frontend Developer*

- Took part in the end-to-end development of websites for various NGOs, focusing on clean code, scalability, and user experience.
- Built dynamic, high-performance Single Page Applications using React, with modular and maintainable UI structure via Styled Components.
- Developed SEO-friendly, server-side rendered websites using Next.js, optimizing for performance and discoverability.
- Designed and managed complex dynamic/static forms using React Hook Form, ensuring flexibility for institutional needs.
- Integrated RESTful APIs using Fetch API, Postman, and handled state management with Zustand.
- Employed Git/GitHub for version control, and ensured quality with Cypress for automated testing.
- Collaborated using tools like Figma, and followed best practices in accessibility and SEO optimization.

#### Projects & NGOs Involved

- İHH
- Yetim Vakfı
- HAK İnsani Yardım Derneği
- Umut Ol Derneği
- Nezir Derneği

## My Projects

### Başvuran Dynamic Form Creation Program (in development)

**Technologies:** React, Next.js, Node.js, Styled-Components, Middleware/Auth, Zustand

- Designed and developed a secure, self-hosted alternative to platforms like Google Forms, enabling users to build customizable multi-language forms with flexible structure and scheduling features.
- Launched this project as a personal initiative to improve technical skills while contributing to local data privacy and reducing dependency on foreign services.

### Fatih Gençlik Vakfı – Scholarship Application Form & Admin Panel

**Technologies:** React, Next.js, Node.js, Express, MongoDB, JWT, PM2, Nginx

- Developed a full-stack web application consisting of a static scholarship application form and a secure admin panel for managing and editing submissions.
- Implemented authentication with JWT and built a responsive, user-friendly interface using React and Next.js.
- Deployed and configured the application on a Linux Ubuntu Server using PM2 and Nginx for process management and reverse proxy setup.

## Full Stack Ecommerce App

**Technologies:** React, React Router DOM, Node.js, Styled-Components, React Context

- Developed an admin panel with full CRUD functionalities for products and categories, including user management and product comment moderation.
- Built core website pages such as Home, About, Sign Up, and Product Detail, ensuring responsive design and clean user experience.
- Utilized React Context for global state management and implemented structured routing using React Router DOM.

## LANGUAGES & SKILLS

---

- Languages: Turkish (Native), English (B2), Arabic (B1)
- Programming Languages: JavaScript, HTML, CSS
- Technologies & Frameworks: React, Next.js, Zustand, StyledComponents, Node.js, React Context, Express, MongoDB, Nginx, PM2, GitHub Pages
